Re: APPEAL of FRN 1483792 Funding Decision

"A technology plan covering the current funding year was not in place at the time of the filing of the Forms 470 and 471. Technology plans are required when applicants apply for more than basic wireless and wire line telephone services."

Broken Bow Public Schools created our first organized technology plan in 1997 as a result of a State of Oklahoma technology grant requirement. Annually every year since 1997 Broken Bow Schools has updated this plan and therefore has had a revised

technology plan in place every year of the E-rate program. Additionally, the annually revised plan is filed with the State Department of Education every year.

I believe there is some confusion as to creation dates and whether there was a plan in place at the time the 470 and 471 was filed. Absolutely without question our technology plan was in place at that time. During the Selective Review there was a question about when the plan was created and I answered the question February 2006. That statement was incorrect in consideration of how the plan applies to the E-rate process. The February 2006 date was the last time it was updated, however, prior to that date there was a qualified technology plan in place as there has been since June 1997 when we applied for and received our first technology grant from the state in the amount of \$200,000. The prior revision date was October 15, 2005? Oklahoma requires us to have 5-year technology plans. However, we update our plan each year at a large meeting with personnel from all sites, administration from all sites, students, and parents. We feel it is very important to stay current on our plan. Our last revision was October 5, 2006.

Thank you for your consideration of our appeal. I am available to discuss this appeal via phone or email.

Sincerely,

Carolyn Davis
